QuickCover
Precompressed, anchorless, rapid installation floor expansion joint cover.

Product Description
QuickCover is a rapid install, elegantly simple, aesthetically versatile coverplate system for new and retrofit floor and wall expansion joints.

QuickCover is supplied in 10-LF lengths and is a composite assembly of precompressed foam that flanks a vertical spline descending from an integral coverplate.

Installation Summary
The assembly is packaged between extruded polystyrene and the precompressed foam is held in compression to less than the intended joint size.

The joint is prepared, a mounting bead of supplied silicone is applied to each joint face and tooled flat, the shrink wrap is removed and the assembly is lowered into the joint.

Weight is applied to the coverplate until the foam has self-expanded into the wet mounting silicone.

Within about one hour the joint is trafficable.

Features
- No visible coverplate screws
- No visible anchoring fasteners
- Flush with floor retrofit into old hardware of failed joint systems
- Bridges and conceals cracked adjacent flooring
- Resists pedestrian and rolling point loads
- Install while occupied using simple traffic diversion
- Install after flooring is installed, leveled and completed
- Cost effective
- Shipped in 10-LF lengths
- ADA compliant bevel and coefficient of friction
- Rapid installation—new or retrofit
- No bolts, anchors, balls, tracks, slides or other fiddly hardware
- No blockouts, recesses, or backfilling
- Aesthetically and practically versatile

Uses
Bridges and seals floor joints in new and retrofit construction for schools, hospitals, airports, offices, malls, etc.

Movement Capability
- Total 100% (+50% and -50%) of nominal material size.

Coverplate Material/Finishes
- Standard finish is mill-finish Type 6061 T-6 Aluminum
- Other finish option, sand-blasted, is available and will affect lead time.
